

The Broncobots Bulletin.

THEY'VE DONE IT

4/17/25 - Recently, Broncobots competed in the Greater Kansas City Regional. After not qualifying for the championships in Houston last year, the team was bound and determined to see Riptide under the bright lights of the FIRST World

Championship, and boy, did the team deliver. The 2025 Greater Kansas City Regional will go down as Team 1987's most successful regional in history. In every single match, scouting, strategy, and drive team worked in absolute synergy, securing our team's first completely undefeated regional event ever. Off the field efforts delivered too, with Impact and pit judging sub-teams working tirelessly to ensure the best chances for the team in judged awards as well. At the end of the day, Broncobots captained the #1 alliance in a commanding on-field victory and won the FIRST Engineering Inspiration Award, the second-highest award in the entire program. Now, the double-champs-qualifiers head to Houston not just as qualifiers, but as winners.

Calendar

- April 15-19: *FIRST* World Championships
