

# The Broncobots Bulletin.

## One For The Books

6/6/25 - Recently, Broncobots hit the road to Texas to compete in the FIRST World Championship for the 2025 season. The Championship event, which marks the end of official in-season play, brought teams from over 30 different countries to compete for the title of world champion. 601 teams competed this year across 8 different fields. An incredible time was had by all and the Broncobots set new team records across the board. Winning 9 out of 10 qualification matches and earning 54 out of a possible total of 60 rank points, Broncobots captained the second seed alliance on the Archimedes field and hit a year-long team goal, winning at least one championship play-offs match. Our pit judging crew also worked hard, securing the team its first championship award in history, coming home with the Gracious Professionalism award on Archimedes.
