Greater Kansas City Regional - Special Edition

## Double or Nothing!

Last weekend, Team 1987 hosted and competed at the Greater Kansas City Regional at Lee's Summit North High School with our award-winning robot FlipSide. After qualifying for World Championships at the Heartland Regional, we continued progress and improved code dramatically. This resulted in recognition for our work; winning the [Innovation in Control Award](Innovation in Control Award)! A note for the alums: This award completes our hexfecta of technical awards, meaning the Broncobots have now won every technical award at least once, a feat only accomplished by 80 other teams in the world. During qualification matches, we were Ranked 1st with a record of 14-3. We were the Alliance 1 Captain and finished the event as Regional Winners after going undefeated in elimination matches. The Broncobots also saw Matthew Allen win a *FIRST* Dean's List Finalist Award! His efforts as a leader on the programming and media teams last year truly show his effort and commitment to *FIRST*. All in all, the event was a huge success for the Broncobots. Thanks to all the amazing volunteers who helped this event run smoothly!

# Mark Your Calendars!

After an amazing season the Broncobots qualified for the World Championship twice! Held in Houston Texas, the World Championship is the highest level competition in any official *FIRST* event and our team is ecstatic for the challenge. Follow us on social media to stay up to date on all things Broncobots. Go Broncobots!
