

The Broncobots Bulletin.

Thank You LSEF!

1/24/26 - This past week, the Broncobots were honored as a recipient of a Lee's Summit Educational Foundation student-led grant! This was the 4th successful application in a row for the team and grant writer Jackson Reed's 3rd in a row. We are incredibly grateful for the continued support of LSEF and look forward to putting this year's funds to good use: purchasing a new TV and stand for our impact presentation team, and a lens kit for our media team to get further training on industry-standard equipment. From impact to media, LSEF's continued support of the Broncobots hands-on learning is more than appreciated!

This Week @ The Shop

This week, the Broncobots finalized the shooter and intake prototyping. With major decisions being made, CAD team sent several components off to manufacturing. Our field build team has made great progress, with one of the Hubs being fully built.

Broncobots Spotlight

Jackson R. (2)

Years on team: 1

Role on team: Build and Manufacturing

1st Robotics Experience: FTC @ PLMS

Fun fact: Favorite game is Minecraft!

Preston S.

Years on team: 4

Role on team: CAD

Favorite Song: Friday
