

# The Broncobots Bulletin.

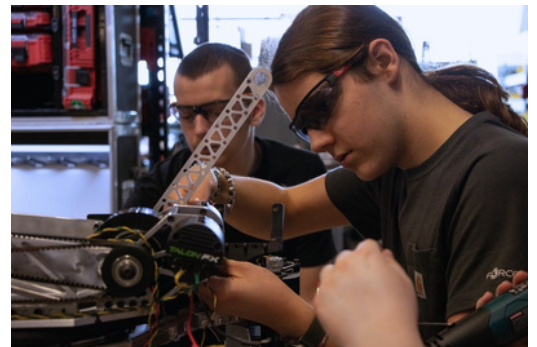

## All Gas No Brakes

3/28/26 - Earlier this month, the Broncobots competed at the Heartland Regional. Ranking first and remaining the only undefeated team by the end of the competition, the Broncobots had an incredible run on and off the field. Not only did Team 1987 take home first place, but they also won the highest honor in robotics, the Regional FIRST Impact Award, for the first time in 13 years. This is just the beginning. This week, Broncobots are headed to the City of Fountains Regional and later will cap off regional play at the Greater Kansas City Regional right here at Lee's Summit North. After that, Broncobots head to the world championship to compete as one of the top teams globally.

## This Week @ The Shop

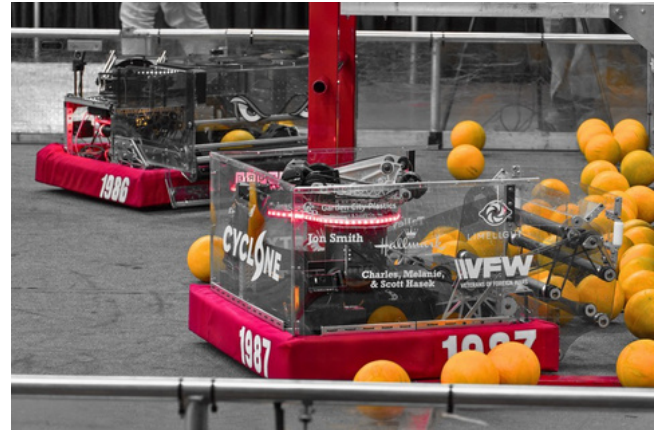

This week, Broncobots continued to innovate and improve components of Cyclone before we head off to our second competition, the City of Fountains Regional.

## Meet Cyclone!

Introducing the 2026 Broncobots robot, Cyclone. This year, the Broncobots went with a dye rotor and turret design that enables full range of motion for firing from anywhere in the alliance zone. An extendable hopper and intake allows for higher fuel capacity. Catch us this week at the City of Fountains Regional and next week at the Greater Kansas City Regional!

## Calendar

- April 2-4: City of Fountains Regional
- April 9-11: Greater Kansas City Regional
- April 29-May 2: FIRST World Championships
