

# The Broncobots Bulletin.

## The MoKan Trifecta

4/20/26 - To cap off a fantastic season of regional play, the Broncobots once again took up the challenge of hosting and competing at the Greater Kansas City Regional. The results: spectacular. Broncobots once again competed as the 1<sup>st</sup> seed alliance captain, picking team 4522 - SCREAM from Sedalia, MO, and 2333 Sapulpa Robotics from Sapulpa, OK to join our alliance. The team then went undefeated through the playoffs and won the Autonomous award. An extra special thank you to everyone who made this event a success, not just the team, but to our parent volunteers who manned the concession stand (making it the most successful on record). Thank you to the event staff, set up/tear down crew from 1730, 1986, and the KC STEM Alliance. Without the incredible support of the entire KC FIRST Community, none of this would be possible. We are so grateful for everything.

## This Week @ The Shop

After finishing up at GKC, Broncobots got straight to work refining robot code, and iterating on designs for subsystem improvement so that Cyclone can have its best days yet on the world stage. Stay tuned!

## Calendar

- April 29-May 2: FIRST World Championships
