Heartland Regional - Special Edition

Houston, Here We Come!

Last weekend, Team 1987 competed at the Heartland Regional at Olathe South High School with our new robot FlipSide! Hopes were high and things were looking good by day 3 when Team 1987, along with alliance partners Team 3184 and Team 2457, went undefeated in Elimination Rounds, winning the regional as Alliance 1 and earning 13th in the world for EPA (Expected Points Added) with a record of 16-1. This win means that the Broncobots will go to the World Championship in Houston, TX! The Broncobots were also featured on Fox 4 KC, a local news station, on Saturday morning. In addition to winning the Regional, we also won the Industrial Design Award to top off an incredibly successful regional competition.

Mark Your Calendars

Despite having already won Heartland, we are just starting our season! We will be hosting and competing at the Greater Kansas City Regional (GKC) at Lee's Summit North High School between March 30 - April 1. We are making significant progress with improved auto consistency, more auto variations, specific driver practice time, and more!

Calendar

- March 30 - April 1: Broncobots host and compete at Greater Kansas City Regional at Lee's Summit North High School
- April 19 - 22: Broncobots @ Houston for World Champs
